Platform for settling disputes online:

The European Commission makes available a platform for settling disputes out of court. This gives consumers the possibility of initially clarifying any disputes that arise in connection with online purchases or online service contracts without having to take the matter to court.

The platform for settling disputes can be reached at this external link: <https://webgate.ec.europa.eu/odr/>. We would point out that we will not participate in any alternative procedures to settle disputes.

If you have any questions, suggestions or wish to provide general feedback, please get in touch with our employees via the contact form or on the phone.
